EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: Figures 3 and 4 do not have valves beginning with "Z2" as indicated in the final two paragraphs of the substitute specification. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance: The claimed combination including the limitations of a system for supplying current to a plurality of solenoid valves of an electrohydraulic valve timing system comprising an inrush voltage line and holding

Art Unit: 3748

voltage line connected to each solenoid valve configured to be actuated independently, a connect/disconnect ground lead switch for each solenoid valve, and forming a solenoid group of two or more solenoid valves, wherein a voltage switch connects the inrush voltage to a common circuit leading to the solenoid valve group, is not disclosed or rendered obvious over the art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The IDS (PTO-1449) filed on 21 April 2005 has been considered. An initialized copy is attached hereto.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and consists of 3 patents.

- Yanai et al. (U.S. Patent 6,276,318) disclose a solenoid valve actuating apparatus for a plurality of engine valves reducing the switching means and forming multiple valve groups and circuits.

- Flohr (U.S. Patent 6,971,346) discloses a system for controlling electromechanical valves including a plurality of valve actuator subsystems with a first and second voltage source and multiple switches.

- Flohr (U.S. Patent 6,978,745) discloses a system for controlling electromechanical valves similar to the above.

Communication

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kyle M. Riddle whose telephone number is (571) 272-4864. The examiner can normally be reached on M-F (07:30-5:00) Second Friday Off.
